DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the legend "OPEN HERE" (claims 3, 10 and 21) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1, 11, 13 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 5,505,376 to Kent et al.

Fig. 8 of Kent et al. discloses the claimed device, especially the line of perforations 63 extending from a corner section 67 to a free side edge opposite the corner section. However, Kent et al. does not show the line of perforations 63 extending parallel to a strip of adhesive on one of the sealing flap or back panel of the envelope. Figs. 3 and 4 of Kent et al. discloses an embodiment, which shows that it is known in the art to provide a strip of adhesive 33 on the sealing flap that is parallel to an analogous line of perforations 39. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the sealing flap of the Fig. 8 Kent et al. embodiment with the parallel strip of adhesive 33 of the Figs. 3 and 4 embodiment, in order to seal the envelope.

4. Claims 3 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 5,505,376 to Kent et al. and U.S. Patent No. 5,570,835 to Sung et al.

Kent et al. discloses the claimed device, as discussed above, except for the corner section 67 having the legend "OPEN HERE". Sung et al. discloses that it is

Art Unit: 3727

known in the art to provide the legend "OPEN HERE" on an analogous openable section of a sealing flap. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the corner section 67 of Kent et al. with the legend "OPEN HERE" of Sung et al., in order to provide the recipient of the envelope a visual indication how the envelope is to be opened.

Response to Arguments

5. Applicant's arguments with respect to claims 1, 3, 11, 13, 21 and 22 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 3727

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F. R. 1.111, including: "The reply must present arguments pointing out the specific distinctions believed to render the claims, including any newly presented claims, patentable over any applied references. A general allegation that the claims "define a patentable invention" without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section. Moreover, "The prompt development of a clear Issue requires that the replies of the applicant meet the objections to and rejections of the claims." Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06 II(A), MPEP 2163.06 and MPEP 714.02. The "disclosure" includes the claims, the specification and the drawings.
